The General Data Company

SELLER PACK · ARCHIVE RECORDS

We license business records to companies that use them to develop AI systems. What is needed is paperwork from an operating business, such as order confirmations, delivery notes, inspection records and complaint files. Records like these were created in the course of the work and have never been publicly available. Freely available datasets contain nothing comparable.

HOW IT WORKS

From your agreement to the first anonymized samples, two to four weeks pass.

- 01 Scope.** We establish together which records are eligible and which stay in the house.
- 02 Mandate.** The agreed scope is set down in writing and remains revocable at any time.
- 03 Transfer.** You send us the files within the agreed scope by email or file transfer. No access to your systems takes place.
- 04 Anonymization.** People, companies, addresses and bank details are replaced by invented entries of the same form. Whatever cannot be replaced reliably is discarded rather than delivered.
- 05 Licensing.** We negotiate with the buyers on your behalf.

WHICH RECORDS QUALIFY

REGULARLY SUITABLE

Order confirmations
Delivery, freight and customs papers
Complaint and damage files
Incoming and outgoing invoices
Inspection and acceptance records
Supplier and customer contracts
Routine correspondence
Filled-in forms of every kind

CASE BY CASE

Internal memos and quality data naming third parties
Drawings, CAD data and specifications
Formulations and process parameters
Development and test reports
Current prices and terms

The more specific a record, the more valuable it is. What is acceptable to you with a view to your intellectual property is something we are glad to settle together.

HOW ANONYMIZATION WORKS

Replacement follows the form of the original: a name becomes a name, a bank detail becomes a number that leads to no existing account. The same company receives the same substitute everywhere, because the cross references between the transactions are the actual subject of the license.

REVENUE

You share in every license granted. The records already exist. There are no production costs and no ongoing effort to set against the proceeds, and what comes in raises your operating profit in full. Nor does it stop at a single sale: the same holdings can be licensed to further buyers over the years without any renewed work on your side. Your company is not named.
